RÉSEAU D'INNOVATION NANOMÉDECINES

Nanomedicine Innovation Network (NM^{IN}) Scientific Meeting

13-14 September 2019

Sheraton Vancouver Wall Centre
1088 Burrard St, Vancouver, BC

Vancouver Nanomedicine Day 2019

This world-class symposium, the fifth event of its kind, will bring together approximately 300 renowned Canadian and international experts from across the nanomedicines field to:

- highlight the discoveries and innovations in nanomedicines that are contributing to global progress in acute, chronic and orphan disease treatment and management; and
- provide unique networking opportunities with UBC and NMN clinician-scientists, basic researchers, trainees, research partners, Board members and globally recognized researchers and innovators.

Since 2014, Nanomedicine Day Vancouver has advanced nanomedicine research, knowledge mobilization and commercialization in Canada by sharing high-impact findings that have captured the attention of the scientific and clinical communities, government, industry and the general public.

Who should attend?

Anyone interested in nanomedicine research and innovation, across sectors, disciplines, and career levels. Registration is free, but you must register and bring your ticket to the registration desk in order to attend.

[Register here.](#)

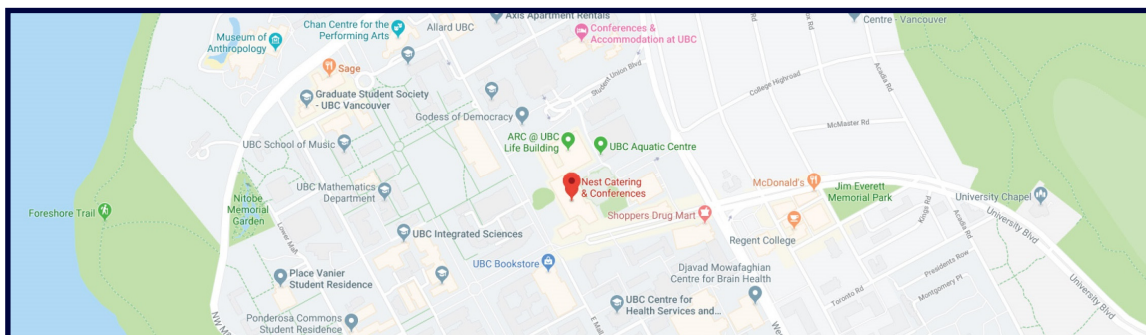

Event Program

Nanomedicine Day Vancouver 2019 will include:

- Keynote addresses by internationally renowned experts Tayyaba Hassan (Harvard Medical School) Christine Allen (University of Toronto), Pieter Cullis (The University of British Columbia), and Shana Kelley (University of Toronto)
- Expert panel discussions featuring researchers, trainees, leading international experts, and industry and government representatives;
- Trainee research posters and presentations; and
- A gala dinner and awards celebration during an evening harbour cruise on the Magic Spirit yacht.

Meeting Venue

Nanomedicine Day Vancouver 2019 will be held at the Nest, located at 6133 University Boulevard on The University of British Columbia campus. The Nest, which opened its doors in June 2015, is an open, light-filled, beautifully situated and environmentally sustainable facility whose style is described as “West Coast casual meets modern elegance.”

NMIN Scientific Meeting

In its first Scientific Meeting, the recently established Nanomedicines Innovation Network (NMIN) will gather its pan-Canadian teams of experts and other stakeholders by invitation to advance:

- NMIN's plans to support innovative new research and commercialization strategies for nanomedicines development and uptake within the healthcare system;
- NMIN's efforts to build capacity in the next generation of nanomedicine researchers and entrepreneurs to strengthen Canada's position as a global leader in nanomedicines innovation; and
- networking and collaboration among researchers, clinicians, trainees, industry and government.

The Nanomedicines Innovation Network (NMIN) is advancing "smart" medicines to defeat disease by delivering small molecule drugs to disease sites and accelerating gene therapy. NMIN aims to establish and mobilize a network drawn from academia, industry, and not-for-profit research enterprises to maintain and improve Canada's position as a global leader in developing next generation nanomedicines.

NMIN's mission is to develop novel therapeutics to cure high-burden human diseases and new diagnostics to detect disease more precisely; to commercialize these products to bring health and economic benefits to Canadians; and to train the skilled workforce required by the growing nanomedicines industry. NMIN is funded by the Government of Canada through the Networks of Centres of Excellence (NCE) Program.

Meeting Venue

NMIN's Scientific Meeting will be held at the Sheraton Vancouver Wall Centre, one of Vancouver's most extraordinary buildings nestled in the center of the exciting downtown district at 1088 Burrard Street, a short distance from such attractions as Stanley Park, Yaletown and shopping on Robson Street.

Invitation to Sponsors

We invite organizations that share NMIN and UBC's enthusiasm for the enormous potential of nanomedicines to become the dominant medicines of the future, to consider partnering with us as event sponsors. We offer various levels of sponsorship to ensure the best fit with your organization's marketing, outreach and networking objectives.

Please review the sponsorship opportunities on the next page and complete a [Sponsorship Agreement form](#), returning it by email to the NMIN Administrative Centre. We are available to answer any questions you may have regarding sponsorship details. For further information, please contact:

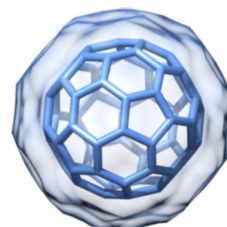

Dr. Diana Royce, Executive Director, NMIN NCE Inc.
