

Offer of a research professor position in the field of RNA nanoparticles at Laval University

Description

The Department of Molecular Medicine of the Faculty of Medicine of Laval University invites applications for a position of research professor, whose objective will be to develop a research and teaching program on RNA nanoparticle-based therapies. This program could include RNA synthesis, RNA encapsulation in nanoparticles, and delivery of these nanoparticles to treat neurological, immune or oncological disease.

The candidate will have: 1) completed a PhD in a relevant discipline (e.g., chemistry, biophysics, biochemistry, physiology, medicine); 2) at least 2 years of experience as a post-doctoral fellowship or equivalent; 3) demonstrated creativity and scientific productivity; and 4) expressed a desire and ability to integrate into a collaborative environment that respects our values of diversity and inclusion.

The applicant is expected to establish an innovative and productive research program, secure funding from external sources, and train highly qualified personnel, including graduate students.

The application must include: 1) a letter of motivation; 2) a curriculum vitae; 3) a summary of scientific background and accomplishments (1 page); and 4) a summary of the proposed research program (2 pages).

Submit candidacy to Luc.Vallieres@fmed.ulaval.ca

Application deadline: November 7, 2022

Laval University

With more than 45,000 students and 10,000 employees, including 1,600 professors in 17 faculties, Laval University is a large institution with a human dimension, located on a green and wooded campus in the heart of beautiful Quebec City.

By becoming a professor at Laval University, you will join a community that is committed to offering a unique student experience and to fostering a bold and open scientific culture, rooted in global challenges and resolutely interdisciplinary.

The employment conditions at Laval University are attractive. In addition to a very competitive salary, you will benefit from a comprehensive and competitive range of social benefits.

In addition, Laval University offers a work environment that promotes your well-being with an inclusive culture where everyone can flourish.
